

Left Hand Creek Flood Control Project

The City of Longmont and DeFalco Construction invite you to attend an **Open House** to learn more about a city improvement project intended to reduce the floodplain in the Southmoor Park area. The project has been designed so that homes and other buildings in the area will not be damaged by the 100-year flood. Some of the planned improvements include a new bridge and pedestrian underpass at South Pratt Parkway, upgrades to the drainage channel along Main Street, and replacement of two pedestrian bridges. The primary location of these improvements will be on South Pratt Parkway between Main Street and Pike Road.

The walking and cycling route map on the back of this page provides more information about how to safely travel to Burlington Elementary School during construction. You may also visit the project website at www.ci.longmont.co.us.

Come to the Open House and:

- Meet with the Project Team including City Engineers and representatives from the DeFalco Construction Company
- Learn about the planned construction, traffic impacts, pedestrian routes, and flood control improvements
- Ask questions and get answers
- Provide input and voice your concerns

Date: **Wednesday, October 26, 2011**
Time: **5:30—7:00 PM**
Location: **Burlington Elementary School
1051 South Pratt Parkway
Longmont, CO 80501**

PROJECT SCHEDULE:

Public Meeting/Open House
October 26

Construction
Late October 2011— October 2012
